

Emperor Theory

Anuj Anand

Emperor's Theory

We are living in the world, where change is happening at the rapid pace, and by the time any concept is known to the nation, another one is in offing.

The New world now runs only three things "Knowledge, Intelligence and Application of Knowledge along with Intelligence".

These three are the "New Emperors of the 21th Century".

Around the Globe, when you travel across all the countries as you move from the East to West, you will see people running to their workplaces from 5.30 am till 9.30 am , whether it is Tokyo, Seoul , Hong Kong , Singapore, Mumbai , New Delhi, Frankfurt , London , New York or Los Angeles.

But, I wonder how many of them really want to work towards their careers, about 90% just work from 9.00 am till 9.00 pm, to earn money for survival, good life and enjoy life.

All my friends in my age group use to say the mantra some 9 years back and also urge me to follow it

"Life is about working hard and partying hard"

I invariably belonged to the novice group of people, who never understand anything in life and still keep wondering about many things around themselves.

But only thing that I understand is the Knowledge, Intelligence and Application of Knowledge along with Intelligence are the key aspect required for the growth of every individual in today scenario , because we are moving towards a Knowledge Economy.

All the rules, which we learned in school, are changing. Learned in 8th Class that large population is bad for the Economy of the Country and now the Marco –economics principles states that Young populations is must for the Growth and economics of the Country .

What makes me wonder is that the new generation falling in the young age (21-32 years), just feel that their jobs are great and they are during something like inventing the some great Theory of relativity.

When in actual reality are just doing what others are doing, they may be the best in team, getting good grade & promotions , translating into cash and perks , but are spending time learning more than they should invest their valuable time in acquiring knowledge concepts etc..

Knowledge broaden your horizon, thinking, perspective towards life and above all help achieve humility, because you come to know that you really don't know anything and there so much knowledge they one needs to gain and attain, that one lifetime is also not sufficient.

MNC's Organization are now looking towards individuals. Those have the following capabilities

- ✓ *To over deliver beyond their specified job role*
- ✓ *Have an affirmative attitude, no one like to have a black cloud hovering over around. (Bosses and team member look for individuals with open mind set , rather than one's have stringent mind block's*

Knowledge help in the generation of ideas and giving the fact the way the world is moving, especially with the globalization and technology, When an individual is right , it can make a difference to the organization , communities , countries

Intelligence is not in the blood, it can be acquired with knowledge.

Knowledge is a Triple edge sword that sharpens the mind and the intellectual capability of individuals and slowly and steady implies on the mind of individuals with application of both knowledge and intelligence.

Never run after jobs, plan a roadmap to one's career and support it with the Emperor's theory, you will surely achieve more than you had thought in life.

Remember that the gospel of life is that

“Individuals are like cloth, the more knowledge is acquired they start burning like light and the darkness of ignorance reduces over the period of time.”

The author for eternity believes that what people could take away from him in life apart from knowledge, he would acquire more to be persistently ready to share more and more with others.

The author constantly feels that the Kid within him is still alive, hence everything happening in the world at all times has some reasoning or an underlying meaning , which need to be explored and logically justified and that is only possible with knowledge .

A humble Request from the Author to all the Reader:-

Please give this a good read and in case any of reader is able to follow the Emperor theory, the author would be highly indebted to them for life, because the individual would have been able to remove their mind blocks and craved a new path towards success.

God bless u and Remain blessed
