

‘What life taught me...’

Anuj

Laws of a Happy Life

“Here are some of my rules for a beautiful and happy life...
Put some trust in me and follow them to enjoy every moment of your life.
Live one life as u lived a hundred...”

Love – The First Law of Life

You need not fall in love with a boy or girl, just love yourself. Love is the only law of life. The person who loves to live enjoys every moment, compare to one who is selfish, is dying every moment of life.

“All love is expansion, all selfishness is contraction”.

Outlook towards Life is Important!

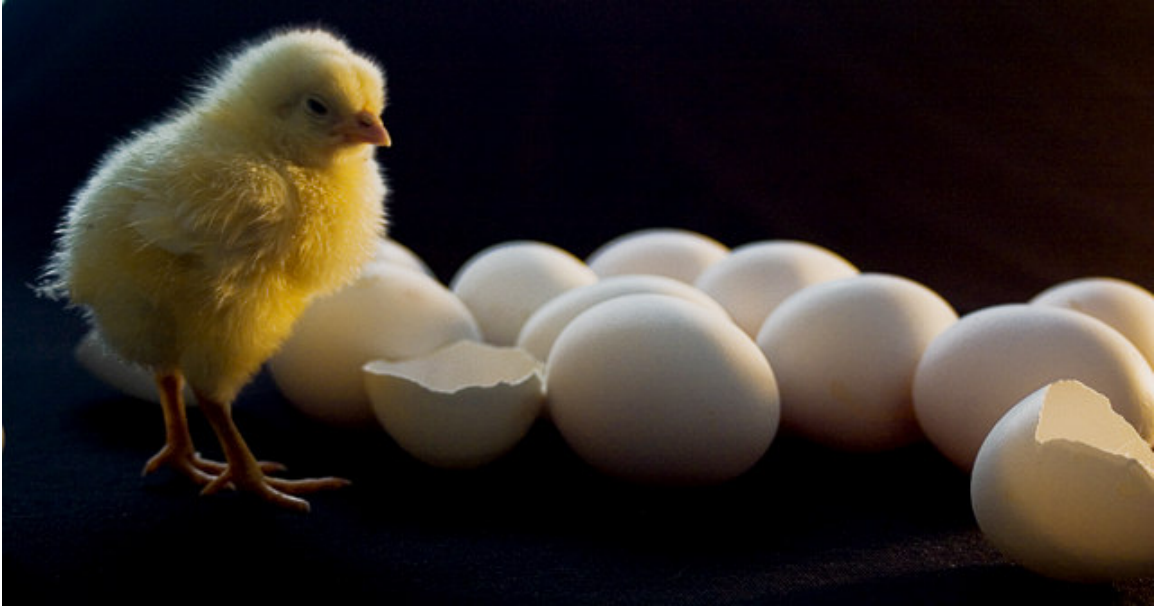

It is our thinking that makes the world around us, what is it for us. It is our thoughts that portray different shades of life. No matter how big the world is it is all present in our mind.

Remember to look at things, people and situations in the proper light.

Life is Beautiful

Always believe in this world - that there is meaning behind everything. Everything in the world is good, amazing and beautiful. If you see something evil, think that you do not understand it in the right sense. Throw the burden on yourselves! If you can analysis it wonderful or else learn a lesson from it, that there is still a lot to be learned.

The Way You Feel

Feel like saint and you will be a saint; feel like hacker and you will be a hacker, feel like a Magician and you will be one. It is feeling that is the life, the strength, and the vitality, without which no amount of intellectual activity can reach God.

Help Others

The king of all laws, Help others, as there is no tomorrow. Because not every one gets a chance to help others.

If you can stretch out a helping hand, do so. If you cannot, fold your hands, say God bless u, and let them go their own way.

Uphold Your Ideals

Our duty is to encourage every one in his struggle to live up to his own highest idea, and strive at the same time to make the ideal as near as possible to the Truth.

Trust your Mind

Life is a calculation, you cannot afford to go wrong or else you will be doomed. Your heart can make a mistake, but your mind cannot go wrong, because there are no emotions in them.

Be Yourself

The greatest asset that a person should have is to be true to oneself. Have faith in yourselves!

Things to cherish and preserve!

Few things cannot be stolen or hacked in this world, blessing of parents, knowledge and destiny.

Stay Happy

Happiness is a state of mind, if want to be happy, you can be happy, no matter what problem comes.

Be true to yourself and do your best

Never live to impress others, the worst thing in life.

You cannot keep everyone happy in this world. Trying to keep others happy, you lose your happiness.

Patience pays

Life is a waiting Game, have patience and you will get what you want.
Never press the panic button.

Nothing is Impossible

Never think there is anything impossible for the soul. If a person wants to do something and is determined to achieve it, he will do it.

The biggest mistake is to think that you are weak, or others are weak.

Learn Everyday And Make It Count

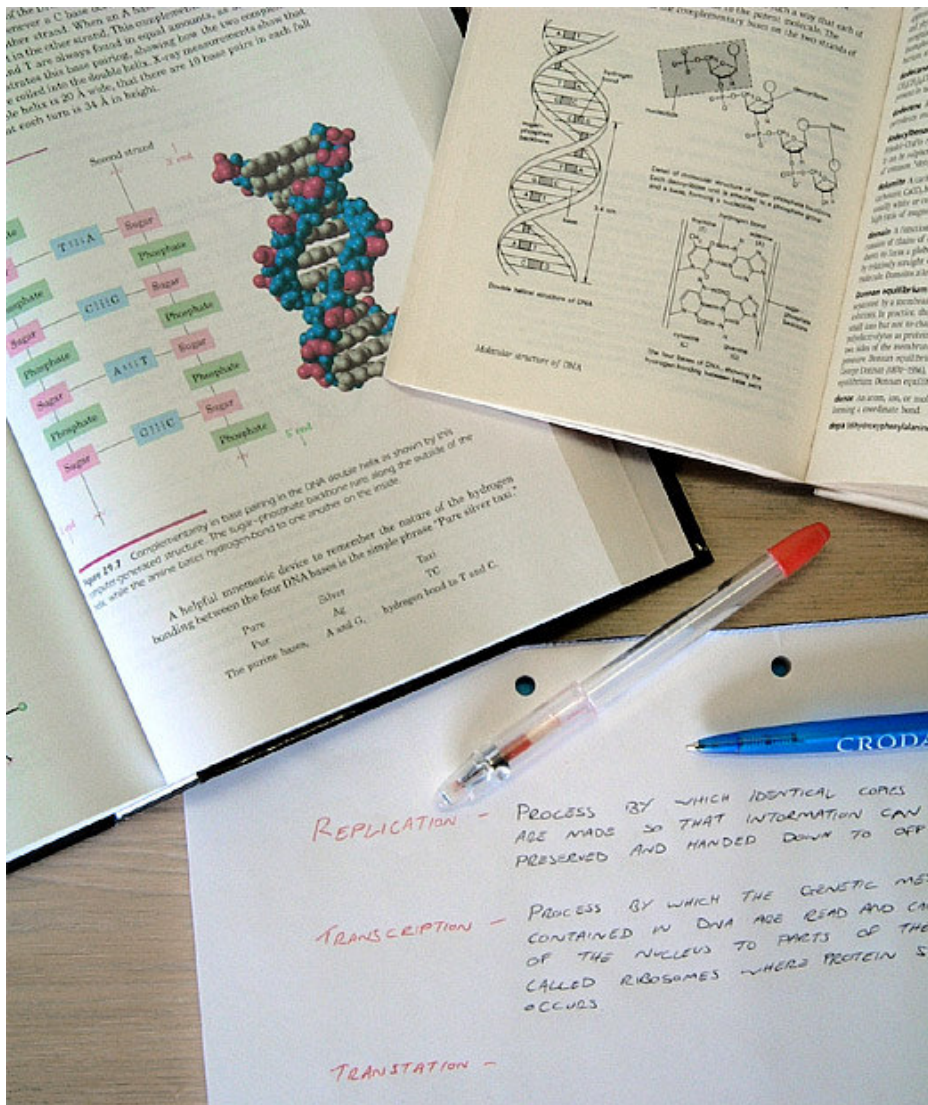

There is no bigger teacher in this world than life, which teaches you every moment. You should be sharp enough to pick up from it.

Knowledge is of Two Types

The first you acquire from reading. Hence Read as much as you can, because no knowledge goes waste, it will be useful at some time of during the course of life.

The second is that, what a person 'learns' when he changes himself from bad to good, it is just like he discovers by taking the cover off his own soul, which is a mine of infinite knowledge.

Be Honest

Being honest is the best thing. Remember that everything in this world can be sacrificed for being honest, but honesty cannot be sacrificed for anything. I have learnt this concept the hard way.

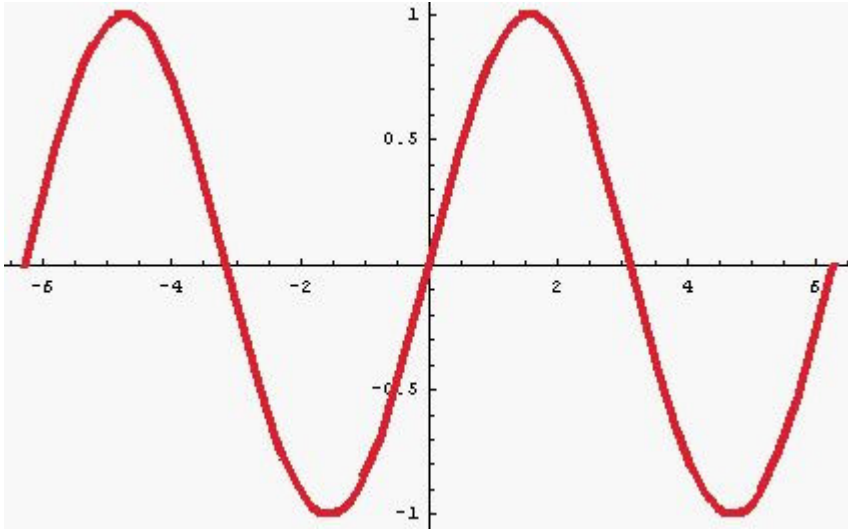

Think Differently

Always think, what others don't think. If you can lead a simple life, don't follow that path, the more complicated life is, the more you will learn.

Life is a sinusoidal wave, No time in life is the same. Life has ups and downs. When you are the rise, never allow success to enter your mind, because the moment success enters in your mind, your downfall starts.

Work hard

Hard work has no substitute.

Don't Point!

Never Blame Anyone, Condemn None

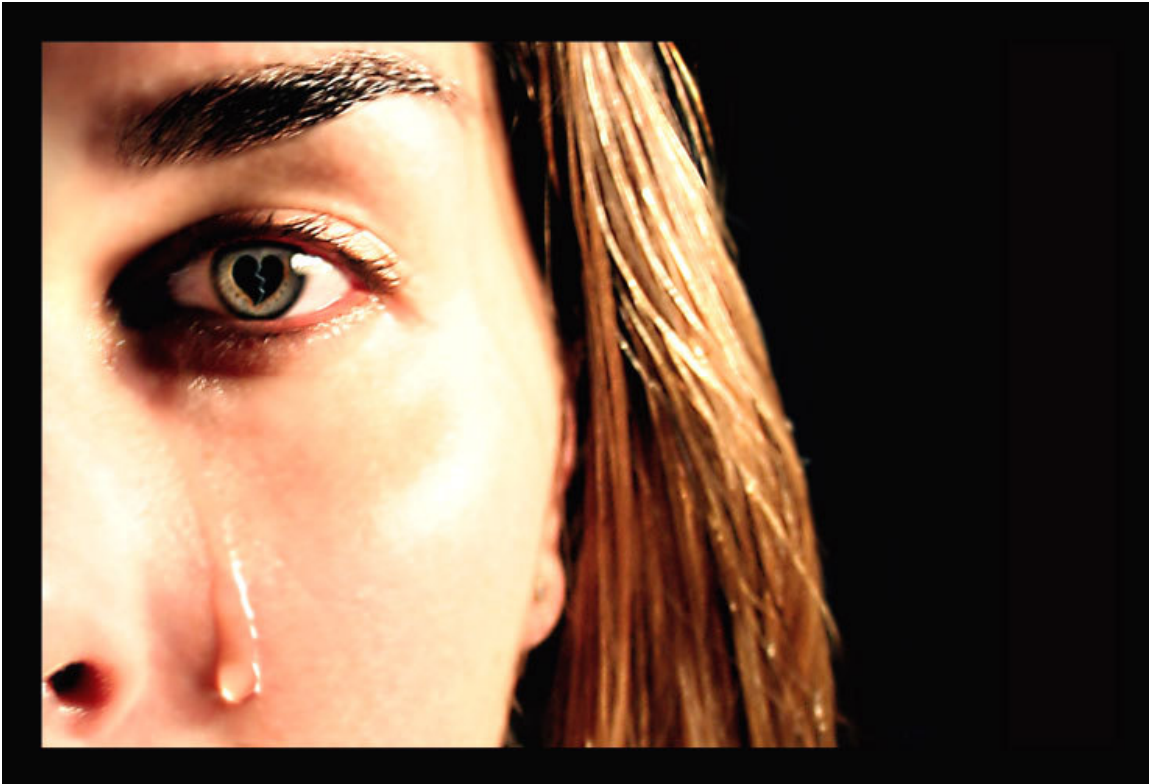

Time is Precious

Learn To value Time. Never waste time, it is most precious thing in our life .
Make the best use of it as time waits for nobody.

Express yourself

If you have a very expressive face, you have won battle of life, without words, since your joy and resentment would be visible to other, and it would do you a lot of good.

Even if you don't have one, do not worry; just say whatever you want to say. If you like something, speak out, If you hate something, vent it out. Never die; with a feeling of resentment, it will kill you.

Smile as much as you can, slowly people around would start liking your company.

Things in this world you cant buy: -
Winning, Health and Death.

Learn from your mistakes

Everything in Life, happens twice. Because God gives us an opportunity to rectify our mistakes, learn from our past, but we are humans.

We still do the same mistake again and again.

Last, but not least there are two Gods in this world-

The One up there and Second is Money.

Unless You don't have the blessing of Both, You cannot survive in this world,

Incase you want to share something with me...
